Series 1: Correspondence/Drafts/Talks

Consists of Professor Heini Halberstam's correspondence, drafts, notes, and talks on mathematical theorems and research, departmental notes and memos, lectures and talks including "Sparse Sieves" and "From Friction to Smooth Numbers". This series is arranged alphabetically by title.

Box 1:

1. Additive Number Theory Draft, 1978
2. Colloquium on the Theory of Numbers: Scientific Program, 1968
3. Correspondence, 1958 - 2012
4. "Four Asymptotic Formulae in the Theory of Numbers" and "On the Representation of Large Numbers as Sums of Squares, Powers, and Primes" Drafts, 1948
5. From Friction to Smooth Numbers Lecture, 1959
6. Landreau's Lenna Notes, 1991
7. Mathematisches Forschungsinstitut Oberwolfach, 1968
8. Mathematics Theorem Notes, undated
9. Sparse Sieves Lecture, undated
10. Sullivan's Theorem Notes, undated
11. These errata Draft, 1990
12. Thin Sieves Notes, undated
13. Untitled Draft, undated

Series 2: Kindertransport: Correspondence/Notes/Publications/Lectures

Consists of Professor Heini Halberstam's correspondence, research, publications and lectures on the topic of the Kindertransport (German *for* "children's transport"). Halberstam was sent to the UK via the Kindertransport in 1938. The Kindertransport was a British program prior to World War II that accepted nearly 10,000 mostly Jewish children refugees from Nazi Germany, Austria, Czechoslovakia, Poland, and Danzig. Also included are Halberstam's own experiences with the program including correspondence with survivors and research on the lives of children who had been rescued through the British program. Additionally, there are Halberstam's lecture notes and papers on this topic. This series is arranged alphabetically by title.
