Series 4: Digital Photographs of International Research and Travel

This series contains digital surrogates of slides taken by Theodore Hymowitz during his international research trips. Researchers need to be aware that the dates listed for digital slides are the scanning dates. I.e. Professor Hymowitz had his slides scanned in 2008 and 2009, during which the original order, labels and dates of the analog slides were not preserved. Because analog slides were discarded after scanning, the archives was unable to recreate original order, labels, and dates. To date slides, researchers are advised to consult Hymowitz's 2015 CV for the dates of his various international research trips, keeping in mind however that Hymowitz repeatedly returned to countries throughout his career.
