Nuclear Weapons Effects on Hardened Structures Technical Reports, 1957-1964

Box 1:

Slow and Rapid Lateral Loading Tests of Simply Supported Beams and Beam-Columns by R.F. Wojcieszak and J.M. Massari, University of Illinois, Department of Civil Engineering, February 1957, Research Directorate Air Force Special Weapons Center, Air Research and Development Command, Kirtland Air Force Base, New Mexico

Final Report, Static and Dynamic Tests of Steel Frame Structures into the Inelastic Range of Deformation by J.M. Massard, Approved by N.M. Newmark, University of Illinois, Department of Civil Engineering, May 1957, Research Directorate, Air Force Special Weapons Center, Air Research and Development Command, Kirtland Air Force Base, New Mexico

Analysis and Design of Domes and Shells, Volume I, by J.E. Duberg, R.L. Jennings, D. McDonald, H.S. Iyengar, and W.M. Yao, University of Illinois, Department of Civil Engineering, September 1958, Research Directorate Air Force Special Weapons Center, Air Research and Development Command, Kirtland Air Force Base, New Mexico

Headquarters, Air Force Special Weapons Center Air Research and Development Command, Kirtland Air Force Base, New Mexico, Analysis and Design of Domes, Arches and Shells, Volume II, Analysis of Circular Arches by R.T. Eppink and A.S. Veletsos, University of Illinois, Department of Civil Engineering, July 1959

Headquarters, Air Force Special Weapons Center, Air Research and Development Command, Kirtland Air Force Base, New Mexico, Analysis and Design of Domes, Arches and Shells, Volume I, Elastic Analysis of Spherical Domes by J.E. Duberg, D. McDonald, R.L. Jennings, H.S. Iyengar, W.M. Yao, University of Illinois Department of Civil Engineering, July 1959

Headquarters, Air Force Special Weapons Center, Air Research and Development Command, Kirtland Air Force Base, New Mexico, Technical Report, an Investigation of the Behavior of Deep Members of Reinforced Concrete and Steel by W.J. Austin, R.E. Untrauer, W. Egger, J.R. Winemiller, Approved by C.P. Siess, Department of Civil Engineering, University of Illinois, 1960

Headquarters, Air Force Special Weapons Center, Air Force Systems Command, Kirtland Air Force Base, New Mexico, Behavior and Design of Deep Structural Members, Part I, Summary of Investigation, University of Illinois, Department of Civil Engineering, April 1961

Headquarters, Air Force Special Weapons Center, Air Research and Development Command, Kirtland Air Force Base, New Mexico, Behavior and Design of Deep Structural Members, Part 2, Tests of Reinforced Concrete Deep Beams with Web and Compression Reinforcement by J.R. Winemiller and W.J. Austin, Approved by C.P. Siess, University of Illinois, Department of Civil Engineering, August 1960

Headquarters, Air Force Special Weapons Center, Air Research and Development Command, Kirtland Air Force Base, New Mexico, Behavior and Design of Deep Structural Members, Part 4, Dynamic Tests of Reinforced Concrete Deep Beams by R.E. Untrauer, University of Illinois Department of Civil Engineering, May 1960

Headquarters, Air Force Special Weapons Center, Air Research and Development Command, Kirtland Air Force Base, New Mexico, Technical Report, Behavior and Design of Deep Structural Members, Part 5, Resistance and Behavior of Reinforced Concrete Beams of Normal Proportions Under Rapid Loading by A. Feldman, University of Illinois, Department of Civil Engineering, March 1960

Headquarters, Air Force Special Weapons Center, Air Research and Development Command, Kirtland Air Force Base, New Mexico, Technical Report, Behavior and Design of Deep Structural Members, Part 6, The Yield Strength of Intermediate Grade Reinforcing Bars Under Rapid Loading by W.A. Keenan and A. Feldman, University of Illinois, Department of Civil Engineering, March 1960

Headquarters, Air Force Special Weapons Center, Air Research and Development Command, Kirtland Air Force Base, New Mexico, Technical Report, Behavior and Design of Deep Structural Members, Part VII, Plastic Behavior of Deep Steel Beams Including Shear Effect, by William Egger, University of Illinois, Department of Civil Engineering, March 1961

Headquarters, Air Force Special Weapons Center, Air Research and Development Command, Kirtland Air Force Base, New Mexico, Response of Arches under Dynamic Loads by R.T. Eppink and A.S. Veletsos, University of Illinois, Department of Civil Engineering, August 1960

Headquarters, Air Force Special Weapons Center, Air Research and Development Command, Kirtland Air Force Base, New Mexico, Technical Report, Response of Arches Under Dynamic Loads by R.T. Eppink, A.S. Veletsos, University of Illinois Department of Civil Engineering, December 1960

Headquarters, Air Force Special Weapons Center, Air Research and Development Command, Kirtland Air Force Base, New Mexico, Analysis and Design of Domes, Arches, and Shells, Volume I, Analysis of Spherical Domes by J.E. Duberg, R.L. Stoughton, R.L. Jennings, Approved by N.M. Newmark, University of Illinois Department of Civil Engineering, August 1960

Headquarters, Air Force Special Weapons Center, Air Research and Development Command, Kirtland Air Force Base, New Mexico, Volume II of Interim Report on “Analysis and Design of Domes, Arches and Shells”, Contract No. AF29(601)-2591, Project No. 1080, University of Illinois Department of Civil Engineering, November 1960

Headquarters, Air Force Special Weapons Center, Air Force Systems Command, Kirtland Air Force Base, New Mexico, The Investigation of Deep Reinforced Concrete Beams Under Static and Dynamic Loading, Vol. I, Strength and Behavior in Flexure by R.E. Untrauer, July 1961, University of Illinois Department of Civil Engineering

Headquarters, Air Force Special Weapons Center, Air Force Systems Command Kirtland Air Force Base, New Mexico, The Investigation of Deep Reinforced Concrete Beams Under Static and Dynamic Loading, Vol. II, Strength and Behavior in Shear by H.A.R. de Paiva, July 1961, University of Illinois Department of Civil Engineering

Headquarters, Air Force Special Weapons Center, Air Force Systems Command Kirtland Air Force Base, New Mexico, The Analysis of the Dynamic Response of an Aboveground Simply Supported Cylindrical Shell Subjected to Blast Loading by J.W. Melin, A.R. Robinson, August 1961, The Department of Civil Engineering, University of Illinois

Numerical Studies of the Dynamic Response of Shallow-Buried Arches Subjected to Blast Loading by Caryll R. Whipple, Lieutenant Commander, Civil Engineer Corps United State Navy, Approved by Nathan M. Newmark, Professor and Head, Department of Civil Engineering, University of Illinois, A Preliminary Draft of a Report of a Research Program Sponsored in Part by Research Directorate Air Force Special Weapons Center, Air Research and Development Command, Kirtland Air Force Base in Cooperation with The Department of Civil Engineering, Project No. 1080, Contract No. AF 29(601)-2591 and Contract No. AF29(601)-4508, August 1961

Headquarters, Air Force Special Weapons Center Air Force Systems Command, Kirtland Air Force Base, New Mexico, Studies of Response of Arches and Domes Under Dynamic Loads by T. Huang, S. Iyengar, R.L. Jennings, October 1961, University of Illinois Department of Civil Engineering

Static Stress-Strain Curves and Energy Absorbing Characteristics of Materials Investigated for Use as Shock-Isolating Media by L.H. Klotz Approved by J.L. Merritt, Draft: Phase II of Final Report on Contract AF29(601)-2151 between Air Force Special Weapons Center Air Force Systems Command and Department of Civil Engineering, November, 1961

Project 1080 Research Summary Compiled by Douglas H. Merkle, August 1962, Technical Documentary Report No. RTD TDR-63-3023, Research and Technology Division, Air Force Weapons Laboratory, Air Force Systems Command, Kirtland Air Force Base, New Mexico, Project 1080

Architectural and Engineering Development Division, Office of Civil Defense, Air Force Design Manual, Principles and Practices for Design of Hardened Structures, Technical Documentary Report Number AFSWC-TDR-62-138, December 1962, Research Directorate, Air Force Special Weapons Center, Air Force Systems Command, Kirtland Air Force Base, New Mexico, Project Number 1080, Task Number 10802, (Prepared under Contract AF 29(601)-2390 by N.M. Newmark and J.D. Hiltiwanger, the Department of Civil Engineering, University of Illinois

Box 2:

A Quasi-Static Theory of Soil-Structure Interaction, September 1964, Technical Documentary Report No. WL TDR-64-91, Research and Technology Division, Air Force Weapons Laboratory, Air Force Systems Command, Kirtland Air Force Base, New Mexico, This Research has been funded by the Defense Atomic Support Agency under WEB No. 13.078, Project No. 1080, Task No. 108003, (Prepared under Contract AF29(601)-4508 by Bedesem, W.B., Das, Y.C. and Robinson, A.R., Department of Civil Engineering, University of Illinois, Urbana, Illinois

A Study of the Behavior of a Clay Under Rapid and Dynamic Loading in the One-Dimensional and Triaxial Tests Final Report, June 1964, Technical Documentary Report No. RTD TDR-63-3116, Research and Technology Division, Air Force Weapons Laboratory, Air Force Systems Command, Kirtland Air Force Base, New Mexico, Project No. 1080, Task No. 108003, This Research has been Funded by the Defense Atomic Support Agency under WEB No. 13.125, (Prepared under AF 29(601)-5535 by Kane, H., Davisson, M.T., Oleson, R.E., and Sinnamon, G.K., Dept. of Civil Engineering, University of Illinois

Behavior of Simple and Restrained Deep Reinforced Concrete Beams Under Static Loading, March 1964, Technical Documentary Report No. RTD TDR-63-3092, Research and Technology Division, Air Force Systems Command, Kirtland Air Force Base, New Mexico, Project No. 1080, Task No. 108003, This Research has been funded by Defense Atomic Support Agency under WEB No.13.157, (Prepared under Contract AF 29(601)-4578 by Dill, A.F., and Siess, C.P., Dept. of Civil Engineering, University of Illinois

A Study of the Dynamic Soil-Structure Interaction Characteristics of Soil Prepared for Air Force Weapons Laboratory Research and Technology Division, Air Force Systems Command, Kirtland Air Force Base, New Mexico, Final Report, 21, January 1964, Prepared under Contract AF 29(601)-5535 by H. Kane, M.T. Davisson, R.E. Olson, and G.K. Sinnamon, The Department of Civil Engineering, University of Illinois

A Shelter Program and its Effect on National Economy, Comments on Shelters for Protection Against Nuclear Blast by N.M. Newmark, Department of Civil Engineering, University of Illinois, an Abstract of a Paper Presented at National Military-Industrial Conference, Chicago, Illinois, 14, March, 1957
