Technical Reports, 1954-

Box 1:

Operating Manual for Synchro Operated Differential Analyzed, Arnold Nordsieck, April 1953

Superconductivity of a Precipitation Hardening Alloy of Aluminum by Richard E. Mould, October 16, 1954

Office of Ordnance Research, Contract No. DA-11-022-ORD-939, Technical Report No. 2, June 15, 1955, Dissolution and Electropolishing of Copper in Phosphoric Acid by Frederick H. Giles and James H. Bartlett, Department of Physics, Urbana, Illinois

The Effect of Pressure on the Superconducting Transition in Tin by Meyer Garber, Department of Physics, April, 1955

The Intermediate State Structure in Cylindrical Superconductors by John F. Cochran and Robert S. Kaeser, Department of Physics, Urbana, Illinois, March 1956

Analysis of Photo Cross Sections, A.S. Penfold and J.E. Leiss, Physics Research Laboratory, University of Illinois May 1958

University of Illinois Department of Physics, Critical Field Measurements on Superconducting Lead Isotopes by D.L. Decker, D.E. Mapother, and R.W. Shaw, Technical Report No. 16, Prepared Under Contract No. DA-11-022-ORD-992 with the Office of Ordnance Research, U.S. Army, for Investigation of the Phenomenon of Superconductivity, Department of the Army Project No. TB2-0001, OOR Project No. 421, May 1959

Technical Report Distribution List, University of Illinois, Contract No. DA-11-022-ORD-992

Status Report No. 1 and Annual Summary Report, November, 1959 – January, 1960, A Study of the Properties of Radioactive Nuclei by Optical Orientation, Department of Physics, Contract No. AF49(638)-781, Air Force Office of Scientific Research, United States Air Force

The Radial Stability of Orbits in a Spiral Ridge Cyclotron, Peter Stahelin, Technical Report No. 1, Office of Naval Research Contract Nonr 1834(05) (Formerly N60ri-071(01)), Physics Department, University of Illinois

Changes in Macroscopic Shape, Lattice Parameter, and Density in Crystals Due to Point Defects by R.W. Balluffi and R.O. Simons, University of Illinois, May 1960

Beam Analyze Magnet Part I, Van Bluemel and Santimay Chatterjee, Technical Report No. 17, Office of Naval Research Contract Nonr 1834(05), Physics Department, May 11, 1960

Research in Nuclear Physics at the University of Illinois under Contract None 1834 (05), Technical Report No. 20, Time Dependence of Mossbauer Transmission, S.M. Harris, Physics Department, University of Illinois, October, 1960

Bremsstrahlung Converter Considerations, P. Axel, Technical Report No. 22, Supplement to Technical Report No. 21, Office of Naval Research Contract Nonr. 1834(05), Physics Research Laboratory, Physics Department, University of Illinois, March, 1961

Semi-Annual Status Report, Covering the Period of July 1, 1961 through December 31, 1961, Topic 1: Application of Mossbauer Effect to the Study of Transmission and Properties of Gamma Rays. Topic 2: Theoretical Study of Orbital Perturbations of Satellites Arising from Atomic, Radiation and Related Factors, Department of Physics, University of Illinois, Contract AF49(638)-896, Air Force Office of Scientific Research, Air Research and Development Command, United States Air Force, Principal Investigator: Frederick Seitz, Prepared: December 26, 1961

The Scattering of 11 MEV – 19 MEV Monochromatic Gamma Rays by the Deformed Nucleus, ^{165}Ho by P.A. Tipler, P. Axel, N. Stein, and D. Sutton, Technical Report No. 33, Research in Nuclear Physics at the University of Illinois under Contract ONR 1834(05), Physics Research Laboratory, Physics Department, University of Illinois, February, 1962

Some Corrections to Partial Wave Dispersion Relations for Pion Photoproduction by John McKeen McKinley, Technical Report No. 38, Research in Nuclear Physics at the University of Illinois under Contract ONR1834(05), Physics Department, University of Illinois, May, 1962

Administrative Report of Contract NONR1834(12), NR 017-413 at the University of Illinois, Urbana, Illinois, Study of the Electronic Properties of Solids, January 1, 1962 through June 30, 1962, Principal Investigator: Frederick Seitz

Box 2:

Harmonic Oscillator Model for Baryons, David Faiman and Archibald W. Hendry, Department of Physics, University of Illinois, Urbana, Illinois

Semi-Annual Status Report, Covering the period of January 1, 1962 through June 30, 1962, Department of Physics, University of Illinois, Urbana, Illinois, Contract AF49(638)-896, Air Force Office of Scientific Research United States Air Force, Principal Investigator: Frederick Seitz

Classical Solution in the Massive Thirring Model, Shau-Jin Chang, Physics Department, University of Illinois, Urbana, Illinois, an Invited Talk at the Topical Conference “Extended

Systems in Field Theory” held at the Ecole Normale Supérieure, Paris, from June 16 to June 21, 1975

Inclusive Pion Production at Large and Small Transverse Momentum in a Model of Hadrons, M. W. Roth, Physics Department, University of Illinois, Urbana, Illinois

Hartree-Type Approximation Applied to a Θ^4 Field Theory, Shau-Jin Chang, Physics Department, University of Illinois, an Invited Talk at the Topical Conference “Extended Systems in Field Theory” held at the Ecole Normale Supérieure, Paris, from June 16 to June 21, 1975

Quantum Fluctuations in a Θ^4 Field Theory II – One Mode Approximation, Shau-Jin Chang, Physics Department, University of Illinois and Fermi National Accelerator Laboratory, Batavia, Illinois and Jon A. Wright, Physics Department, University of Illinois

A New Method in the Theory of Indirect Excitons in Semiconductors, N.O. Lipari, Webster Research Center, Xerox Corporation, Webster, New York and M. Altarelli, Department of Physics, University of Illinois at Urbana-Champaign

Backward Production in $\pi^- p \rightarrow p \pi^+ \pi^- \pi^-$ at 8 GeV/c by A. Abashian, B. Eisenstein, J.D. Hansen, W. Mollet, G.R. Morris, B. Nelson, T. O’Halloran, J.R. Orr, D. Rhines, P. Schultz, P. Sokolsky, and R.G. Wagner, University of Urbana-Champaign and J. Watson, Argonne National Laboratory and N.M. Gelfand, University of Chicago, Chicago Illinois and M. Buttram, Iowa State University, Ames, Iowa

The Period-Pulse-Width Distribution of Pulsars and Their Division into Three Classes, D.H. Roberts, Department of Physics, University of Illinois at Urbana-Champaign

Fermion Contributions to the Effective Potential and the Kink Mass, Shau-Jin Chang, Physics Department, University of Illinois and Tung-Mow Yan, Laboratory of Nuclear Studies, Cornell University

Reggeization in Yang-Mills Theories, Lawrence Tyburski, Department of Physics, University of Illinois

Period Variations in Her X-1 and Cen X-3: Short Noise or Tkachenko Oscillation?, F.K. Lamb and D. Pines, Department of Physics, University of Illinois at Urbana-Champaign and J. Shaham, Racah Institute of Physics, Hebrew University, Jerusalem, Israel

Application of the Renormalization Group to Phase Transitions in Disordered Systems, G. Grinstein, Department of Physics, University of Illinois at Urbana-Champaign and A. Luther, Department of Physics, Harvard University, Cambridge, MA

Bound State Wave Packets, Carlo U. Segre and J.D. Sullivan, Department of Physics, University of Illinois

A Transient Analyzer with Logarithmic Time Base, R.H. Austin, K.W. Beeson, S.S. Chan, P.G. Debrunner, R. Downing, L. Eisenstein, H. Frauenfelder, and T.M. Nordlund, Departments of Physics and Biophysics, University of Illinois

ILL-(EX)-75-29, October 1975, Invited Paper, Presented at the VI International Conference on Mossbauer Spectroscopy, 25-30 August 1975 in Cracow, Poland, Dynamics of Biomolecules, Hans Frauenfelder, University of Illinois at Urbana-Champaign

ILL(TH)-75-27, October, 1975, Reggeization of the Fermion-Fermion Scattering Amplitude in Non-Abelian Gauge Theories, Lawrence Tyburski, Department of Physics, University of Illinois at Urbana-Champaign

Dislocation-Defect Interactions and Mechanical Properties of Crystals, A.V. Granato, Department of Physics and Materials Research Laboratory, University of Illinois at Urbana-Champaign

Soft X-Ray Threshold Shapes Extracted from Linde's Rule in the Optical Alchemy Approximation, John D. Dow, Donald R. Franceschetti, P.C. Gibbons, and S.E. Schnatterly

Applications of Time Dependent Perturbation Theory in Computations of Theoretical Mossbauer Spectra by Thomas A. Tumolillo, Technical Report No. 175, Research in Nuclear Physics at the University of Illinois, Technical Report No. 1, Supported by the National Science Foundation under Grant No. NSF GP 9311, Physics Department, University of Illinois, November, 1968

Trajectories of Field Emitted Electrons in a Superconducting Microwave Accelerator, R.M. Laszewski, Technical Report 191, Physics Research Laboratory, University of Illinois, March 1972
