> Gutenberg Illuminated Leaf Replica

ELECTRONIC RECORDS

Online Electronic content:

> Contains a sample of the electronic content from the Michael S. Hart electronic records, including articles, press releases and newsletters related with the Project Gutenberg, as well as some of Hart's political and creative writings.

> Processing Note: These files have been re-arranged from their original order by archival staff, in order to facilitate access in the online environment. This work was completed in February 2015.

Nearline Electronic Content

> Contains all the electronic contents from the Michael S. Hart electronic records, including correspondence, article parts, article drafts, article reprints, book excerpts, press releases, newsletters, song lyrics, digital and digitized photographs, audiovisual material, website files and software files concerning the creation of eBooks and the Project Gutenberg. Materials also relates to Hart's political and creative writings and personal life

> Processing Note: In February 2015, archives staff took the following actions to prepare a nearline access version of Michael S. Hart's electronic records: (1) Ran virus-scan program on the files; (2) Used Identity Finder, TreeSize Pro, and DROID to extract metadata in order to facilitate appraisal and processing decisions; (3) Used TrID file extension identifier to analyze and append missing file extensions on a number of files during processing; (4) Used Aid4mail to migrate EML email files to MBOX; (5) Deleted files containing proprietary, confidential, and sensitive information from online and nearline access copies. Electronic materials came in two accessions, which were kept separate so that provenance can be tracked.
