Photographic Subject File, 1868-

UNIVERSITY OF ILLINOIS ARCHIVES
March 19, 2021

Photographic material in the University Archives is arranged by its source in the appropriate record group, sub-group and record series, with one exception.

The exception is a Photographic Subject File, including photographs less than 8.5 x 11 and oversized photographs received as special gifts or individual items. This file is arranged alphabetically according to the following standard subject classification and includes reference prints or negatives of photographs and extra prints of photographs in other record series. The file includes cross reference sheets for significant photographs in other record series where extra prints are not available. A separate series is maintained for glass plates for which no prints are available (RS 39/2/27).

Each record series containing photographs has a definite arrangement to permit ready access. This arrangement may be chronological, numerical by negative or alphabetical by subject according to the standard subject classification for photographs.

The following data are marked on all processed photographs and cross reference sheets:

	<u>Regular</u> <u>Record Series</u>	<u>Photographic</u> <u>Subject File</u>	
		Gifts	Extra Copies
Subject Classification	(X)	X	X
Date	X	X	X
Location and Subject	X	X	X
Source		X	X
Negative Number	X	X	X
Record Series Number			X

If the source of a photograph in the Photographic Subject File is not shown on the back, it was received from the University Library in September 1963, which acquired it from the Public Information Office, Alumni Office or unknown sources. Unless indicated otherwise, all secondary and tertiary arrangements are chronological.
